Shanghai, China

Partner with Powerful Brands

Over the past 4 years, the CLEANCONNECT™ has become the nexus for connecting China market with global technology network on the business of the environment. In 2019, CLEANCONNECT will again serve as the quintessential platform to transform technology challenge into business opportunities while building the clean economy of the future.

IEexpo China is the Asia's leading environmental show, covering water and sewage treatment, waste management, site remediation and air pollution control & air purification. About 66,580 professional visitors from 59 countries and regions came to Shanghai for IEexpo 2018, with 1,762 exhibitors and 128,000 square meters floor space.

China Utility Week is a combination of exhibition areas, Summit for industry strategies and development trends discussion, Hub for actual industry solutions analysis and Initiate! Startup and Young talent program. Over 100 exhibitors, divided into various exhibition areas and national pavilions will show their systematic solutions. Industry leaders and experts from all over the world will present their speeches, shared wisdom and vision and analyze global industry landscape, as well as cutting-edge technologies and market trends in CUW.

Determined and Disruptive B2B Mission

We facilitate your success in China

UMORE will identify relevant Chinese business partners for the European companies, based upon close analysis of the products and services the individual European companies can offer. UMORE aims towards setting up at least 5 business meetings all EC2i companies during the mission, and will evaluate and follow up on in the months after meetings have taken place. The EC2i companies are expected to engage in constructive dialogue with UMORE and provide adequate information that can support UMORE in identifying relevant business partners and thereby maximize the possibilities of creating mutually beneficial business agreements.
